

Motivation Letter from Johanna Trosien

for the Position of Education Officer

Dear NB, dear network, dear fellow ESNers!

I have been a member of ESN for more than two years now and during this time I have constantly been getting involved more and more on the local and regional level. Now, I would love to take up the next challenging and exciting chapter of my ESN-career by working with you guys on the national level. The position of the Education Officer is a perfect fit for me in many ways: During my time at ESN Hamburg, I have been establishing and keeping up collaborations with three different IROs. I started this work as Partnership Manager and have been continuing it as Local President because I love advocating for ESN and representing our association to the outside, especially to educational institutions. As I have been working in an IRO myself for nearly two years now, I am already somewhat familiar with the educational policies regarding academic exchange and eager to learn more about all that from the perspective of ESN. Last but not least, I am excited to communicate with other student initiatives and would be honoured to represent and advocate for ESN Germany on this level, too.

Lots of ESN love from Hamburg,

Johanna
