Open Call for the National Board 2021/22

Munich, 11th January 2021

My motivation to apply for Partnership Manager of ESN Germany

Dear Sections and Members of ESN Germany,

I am happy to be able to apply for the National Board as a Partnership Manager for the upcoming mandate on April first 2021.

After getting first impressions of the NB takeover on your social platform and getting a lot of further information – especially from Hannah as the current PM – my interest for this position highly increased. Now I am more than sure that no other position could please me more as well as challenge myself more than any other one. That's why I want to tell you more about me and my personal motivation to be the successor for this position.

I'm aware that it takes a huge amount of responsibility and reliability to be a member of the National Board. Even though I'm quite a new member, I want you to give me the chance to prove my abilities.

I never thought that I will be so curious and motivated but the idea of representing ESN Germany to current and potential partners and sponsors gives me energy, self-confidence and inspiration. Cooperating with our network is a privilege which a lot of firms and companies should be aware of.

Through several conversations with Internationals, I realised how much each of both sides - companies as well as Internationals - can benefit from a cooperation. There just has to be one person who can connect these both sides. I would be honored to be this person.

My idea for the upcoming mandate? ESN Germany as a reliable partner should be introduced and presented to as many people as possible. Simultaneously, I know that not everyone is able to see these benefits and I am going to experience rejections, especially because of economical reasons during this pandemic. But I'm prepared for those.

I am studying law and therefore I necessarily have to be tough and disciplined. Dealing with contract law on a regular basis gives me an advantage to understand cooperation contracts and conditions. Also, business and finance have always been in my range of interests.

I would like to maintain and strengthen and, if possible, expand existing cooperations. Also, to find future sustainable collaborations in order to expand our possibilities.

After all, I can't wait to meet all of the other sections and members of ESN – hopefully soon in person - to be productive but also enjoy our spare time together!

I am looking forward to get to know all of you and respond to every question you might have!

All the best,

Baschi Alzanbekova
